Call for Papers
Discrete Applied Mathematics

Special Issue: *Graph Theory and Combinatorics*

_____

"The Second Malta Conference in Graph Theory and Combinatorics," held between the 26th and 30th June 2017 in Qawra, Malta, commemorates the 75th birthday of Professor Stanley Fiorini. The first conference was organized by Stanley Fiorini and Josef Lauri in 1990 in Bugibba.

As is evident from the research interests of the fourteen Plenary Speakers, the purpose of this conference is to share and discuss a whole spectrum of topics within the interrelated fields of graph theory and combinatorics. This conference aims to bring together mathematicians from across all the continents, including researchers in the initial stages of their careers and others who are very renowned in their area.

A special issue of *Discrete Applied Mathematics* containing substantially expanded versions of some conference papers will be published. Conference papers should be cited where appropriate. Submissions of contributions associated with the themes of the conference and not presented at the workshop are also welcome. All articles will be thoroughly refereed according to the high standards of *Discrete Applied Mathematics*.

The full papers must be submitted through http://ees.elsevier.com/dam, the Elsevier Editorial System. When submitting your paper, be sure to specify that the paper is a contribution for the Special Issue of **2MCGTC2017**. Please see the *Author Instructions* on the site. Also select the article type S**I: 2MCGTC2017.**

The deadline for submission is *15th October 2017.*

Accepted papers will be published online individually, before print publication.

We are looking forward to receiving your contribution.

The Guest Editors,

Irene Sciriha (Managing Guest Editor)
Josef Lauri
Peter Borg
John Baptist Gauci
