
Call for Papers
Annals of Operations Research

Special Issue: Business Analytics and Operations Research

The **Annals of Operations Research** seeks submissions for a special issue on **Business Analytics and Operations Research**. The deadline for submission is **January 31, 2020**.

For this special issue, we expect original research papers of high quality providing theoretical and/or practical applications of business analytics and operations research models. We especially welcome innovative contributions of new methods and applications of operations research models involving large scale data analysis from business or real-life problems.

The main topics of interest are:

- business process modelling and solutions
- data analytics and data technologies
- data acquisition, integration and data mining
- computational modeling and data integration
- algorithms and systems for big data search
- privacy preserving in big data collection
- methodologies for large scale computing
- predictive analytics
- analytics in operations and supply chain management
- statistical and operation research modeling in business analytics
- inventory models in business decision making
- game theoretical application in business intelligence
- web and social media analytics
- health care analytics
- analytics in banking, insurance, marketing

In particular, we encourage speakers at the international *Conference on Business Analytics and Operations Research* held during June 14 - 16, 2019, to submit full, extended versions of their presented papers. However, other relevant papers are also welcome. Contributions arising from papers given at a conference should be substantially extended, and should cite the conference paper where appropriate.

Instructions for authors can be found at:

<http://www.springer.com/business/operations+research/journal/10479>

Authors should submit a cover letter and a manuscript by **January 31, 2020**, via the Journal's online submission site. Manuscripts submitted after the deadline may not be considered for the special issue and may be transferred to a regular issue.

Please see the Author Instructions on the web site if you have not yet submitted a paper through Springer's web-based system, *Editorial Manager*. Be sure to leave a comment that your work is intended for the special volume and to select the article type ***S.I. : Business Analytics and Operations Research***.

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.
