Special Issue: 14th Cologne-Twente Workshop on Graphs and Combinatorial Optimization (CTW 2016)

The 14th edition of the Cologne-Twente Workshop on Graphs and Combinatorial Optimization (CTW 2016, <http://www.math.utwente.nl/~ctw/>) was held on June 6-8, 2016 at Palazzo Feltrinelli in Gargnano, Italy, a historical building belonging to the University of Milan.

Following the tradition of previous CTWs, a special issue of *Discrete Applied Mathematics* will be devoted to a selection of papers on topics related to the themes of the workshop (graph theory, combinatorial optimization and the design and analysis of algorithms).

All interested researchers are invited to contribute to this special issue. Submissions of contributions not presented at the workshop are also welcome.

All articles will be thoroughly refereed according to the high standards of *Discrete Applied Mathematics*.

The full papers must be submitted through the Elsevier Editorial System (<http://ees.elsevier.com/dam>). When submitting your paper, be sure to specify that the paper is a contribution for the Special Issue of **CTW 2016**, so that your paper is assigned to the guest editors. Please see the Author Instructions on the site if you have not yet submitted a paper through this web-based system. Be sure to note that your work is intended for the Special Issue and to select the article type **SI: CTW 2016**.

The deadline for submission is **March 31, 2017**.

Accepted papers will be published online individually, before print publication.

We are looking forward to receiving your contribution.

The Guest Editors,

Alberto Ceselli
Roberto Cordone
