Call for Papers
Annals of Operations Research
Special Issue: Project Management and Scheduling

The *Annals of Operations Research* seeks submissions for a special issue on Project Management and Scheduling devoted to the 16th International Conference on Project Management and Scheduling.

High-quality papers are sought from participants of the conference but submissions are also welcome from others with novel theoretical or applied contributions fitting within this area. Papers should employ a rigorous research methodology, including operations research and empirical research, and should have relevance and practicable implications. Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere.

The main topics of interest and themes of the special issue include (but are not limited to):

Project Management	Machine Scheduling
* network modelling	* shop scheduling
* project scheduling	* scheduling with additional constraints
* resource management	* machine assignment and scheduling
* due-date management	* flexible/robust scheduling
* project risk management	* grid scheduling
* project scheduling under uncertainty	* Multicriteria scheduling
* proactive/reactive project scheduling	* applications
* multicriteria project scheduling	* software
* applications	
* software	

Submission Deadline and Instructions

Authors should submit a manuscript by the 30th of September, 2018 via the Editorial Manager System (http://www.editorialmanager.com/anor/), choosing

"**S.I.: Project Management and Scheduling 2018**" as the article type. Also note that formatting instructions (including LaTeX macro package and Word template) can be found on the Annals of of OR website:

http://www.springer.com/business/operations+research/journal/10479.

Papers will be subject to a strict review process managed by the Guest Editor and accepted papers will be published online individually, before print publication.
