
Call for Papers
Annals of Operations Research
**Special Volume: Multi Criteria Optimization and Goal
Programming in Science, Engineering, and Social Sciences**

The *Annals of Operations Research* seeks submissions from researchers with expertise on new developments in multi-criteria optimization, goal programming, and applications to science, engineering, and social science.

This call for papers is connected to but not restricted to the special session on Multi-Criteria Decision Making: Theory and Application to Science and Engineering organized during the 14th International Conference Computational and Mathematical Methods in Science and Engineering which will be held on July 3-7, 2014 in Rota (Cadiz, Spain).

The main topics of interest are:

- Advances in multi-criteria decision making
- Multi-objective programming and goal programming
- Stochastic multi-criteria optimization
- Fuzzy multi-criteria optimization
- Application to biology, engineering, environment, finance, image processing, management, medicine, and supply chain management.

Instructions for authors can be found at:

<http://www.springer.com/business/operations+research/journal/10479>

Authors should submit a cover letter and a manuscript before October 31, 2014, via the journal's online submission site. Manuscripts submitted after the deadline may not be considered for the special volume and may be transferred to a regular volume.

Please see the Author Instructions on the web site if you have not yet submitted a paper through Springer's web-based system, Editorial Manager. Be sure to state that your work is intended for the special volume and to select the article type **S.I.: CMMSE**.

Papers will be subject to a strict review process managed by the Guest Editor and accepted papers will be published online individually, before print publication.
