**Call for Papers**  
*Discrete Applied Mathematics*

**Special Issue: Recent Advances in Linear Optimization**

---

In an effort to promote interaction between researchers interested in geometric, combinatorial, and computational aspects of linear optimization, we are editing a special issue on recent advances in linear optimization.

All interested researchers are invited to contribute to this special issue. The topics should relate to the theoretical and algorithmic aspects of linear optimization and its applications to discrete and continuous optimization. Submissions of contributions not presented at the workshop are also welcome.

All articles will be thoroughly refereed according to the high standards of *Discrete Applied Mathematics*.

The full papers must be submitted through the Elsevier Editorial System (<http://ees.elsevier.com/dam>). When submitting your paper, please be sure to specify that the paper is a contribution for the Special Issue of the Workshop on **Recent Advances in Linear Optimization** and to select the article type **SI: Linear Optimization**, so that your paper is assigned to the guest editors. Please see the Author Instructions on the site if you have not yet submitted a paper through this web-based system.

The deadline for submission is **March 31, 2015**.

Accepted papers will be published online individually, before print publication.

We are looking forward to receiving your contribution.

The Guest Editors,

Antoine Deza            [deza@mcmaster.ca](mailto:deza@mcmaster.ca)
