

Call for Papers

Special Issue of Discrete Applied Mathematics on Combinatorial Optimization

We invite submissions of novel research articles for a forthcoming issue of *Discrete Applied Mathematics* on Combinatorial Optimization.

This special issue will be dedicated to the International Symposium on Combinatorial Optimization that was held in Hammamet, Tunisia, March 24-26, 2010. However it is also open to papers which have not been presented at the conference.

High quality research papers are solicited to address theoretical as well as practical issues of Combinatorial Optimization. Topics of interest include, but are not limited to:

- Approximation algorithms
- Cutting planes algorithms
- Polyhedral combinatorics
- Local search algorithms
- Computational complexity
- Graph and network algorithms
- Linear and integer programming
- Interior point methods

The deadline for submission of full papers is **extended to October 15, 2010**.

All articles will be thoroughly refereed according to the high standards of the journal

For their submissions, the authors should follow the “Guide for Authors” of the journal website <http://ees.elsevier.com/dam/> The article type for this issue is “**Special Iss: Combinatorial Optimization**” and selecting this article type will ensure that the submission is sent to the editors of the special issue.
