This special issue is to celebrate the 40th anniversary of the publication of the seminal paper on Data Envelopment Analysis (DEA) by Charnes, Cooper, and Rhodes. The paper was a milestone in the broader area of efficiency and productivity analysis and it has given rise to a very large number of theoretical developments and empirical applications in the field. In this Special Issue we expect high quality original research papers. We would especially welcome contributions to the methodology of DEA as well as innovative applications of it to real life problems such as regulation, finance, healthcare, and education to name but a few.

Manuscript Preparation

Please refer to the Journal Information and Author Guidelines for additional information on manuscript preparation at http://www.springer.com/journal/10479

All manuscripts should be submitted online at http://anor.edmgr.com/, when submitting the manuscript please select the article type “SI: DEA: 40 Years On”.

Submission Deadline May 31, 2018

( Early submission is recommended. The referee process will start upon submission of the paper. Accepted papers will be published individually online as they are accepted.

Notes for Prospective Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Contributions arising from papers given at a conference should be substantially extended, and should cite the conference paper where appropriate.

Reviewing

Submitted papers will be peer-reviewed in the same manner as any other submission to a leading international journal. The major acceptance criterion for a submission is the quality and originality of the contribution.
