Special Volume on

## ECQT 2014: Computational Methods and Applications in Queueing Theory

This is a call for papers that make a significant contribution to the topic Computational Methods and Applications in Queueing Theory. It is open to all researchers of this area. We would like to encourage, in particular, all participants of the First European Conference on Queueing Theory (ECQT 2014) to submit extended versions of their presented papers.

Authors should submit a cover letter and a manuscript by November 1, 2014, via the Journal's online submission site. Manuscripts submitted after the deadline may not be considered for the special volume and may be transferred to a regular volume. All papers will be refereed according to the high standards of the *Annals of Operations Research*. Accepted papers will be published online individually, prior to the print publication of the entire volume. For more information regarding the preparation of the manuscript and the online submission, please visit the journal website at

<http://www.editorialmanager.com/anor/>

Please be sure to mention that your work is intended for the special volume and to select the article type **S.I.: ECQT 2014**.

The First European Conference on Queueing Theory (ECQT 2014) - A Continuation of the Madrid Conferences on Queueing Theory - will be held in Ghent, Belgium on August 20-22, 2014. It aims to be a meeting place where scientists and technicians in the field can find a discussion forum to promote research, encourage interaction, and exchange ideas. The conference is open to all trends in Queueing Theory, including the development of the theory, methodology advances, computational aspects, and applications. For further information on the conference, please go to
