

CALL FOR PAPERS

Special Issue of *Discrete Applied Mathematics on Graphs and Optimization*

We invite submissions of research papers for a forthcoming special issue of *Discrete Applied Mathematics* on Graphs and Optimization.

This special issue is dedicated to the Seventh International Colloquium on Graphs and Optimization (GO VII) which took place in Ovronnaz, Switzerland, June 13 – 17, 2010, and was organized in honor of four people who made remarkable contributions in the area of graphs and optimization: Maurice Cochand, Alain Hertz, Alain Prodon, and Marino Widmer.

The call is not limited to the participants of the meeting and is open to all papers related to the main theme of the event. Topics of interest include, but are not limited to:

- Scheduling
- Logistics and supply chain management
- Computational complexity
- Graph and network algorithms
- Graph coloring
- Graph classes
- Graph invariants
- Network design
- Integer linear programming
- Polyhedral algorithms for graph problems

The deadline for submissions of full papers is November 30, 2010.

All papers will be thoroughly refereed according to the high standards of the journal.

In order to submit their papers, the authors must follow the guidelines on the journal website <http://ees.elsevier.com/dam/>. Be sure to note that your work is intended for the special issue and to select the article type **Special Issue: GO VII**.
