
Call for Papers
Discrete Applied Mathematics

Special Issue: LAGOS 2011

We are very happy to announce the call for papers for a special issue of *Discrete Applied Mathematics* devoted to selected full papers from LAGOS 2011.

We invite all contributing authors from LAGOS 2011 to submit full-paper versions of the extended abstracts accepted and presented at the conference, as well as authors of papers of general interest to the conference participants.

Please note that, in the first case, the full papers must include substantial enhancements with respect to the extended abstracts (including proofs, further results, computational experience, etc.) and must comply with the instructions for authors and quality requirements of *Discrete Applied Mathematics*. The full papers will be subject to a new refereeing process.

We also extend this invitation to the LAGOS 2011 plenary and semi-plenary speakers, who can submit papers related to their talks at the conference or papers of general interest to the conference participants.

The deadline for submission is **October 31, 2011**.

Instructions for authors can be found at: <http://ees.elsevier.com/dam/>

Authors should submit a cover letter and a manuscript by October 31, 2011, via this online submission site. Manuscripts submitted after (date) may not be considered for the special issue.

Please see Author Instructions on the site if you have not yet submitted a paper through this web-based system. Be sure to note that your work is intended for the Special Issue and to select the article type **Special Issue: LAGOS 2011**.

Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.

Guest Editors: Flavia Bonomo, Tom Liebling, Javier Marenco, Jayme Szwarcfiter, and Mario Valencia-Pabon.
