
Call for Papers
Annals of Operations Research
**Special Volume: Operations Research Models in Banking
Management**

The *Annals of Operations Research* seeks submissions for a special volume on ***Operations Research Models in Banking Management***. The deadline for submission is September 30th, 2011.

Main topics of interest:

The quantitative aspects of banking management are now stronger than ever and operations research (OR) has clearly much to offer in this field. The contributions of OR in banking management cover a wide range of areas, such as risk assessment, asset-liability management, financial planning, portfolio optimization, internal control, mergers and acquisitions, quality management, human resources management, productivity and efficiency measurement, etc.

The purpose of this special volume is to present the recent advances in the use of OR models in banking management, covering both new theoretical developments and innovative applications. On the methodological side, the volume aims to present new realistic and powerful OR models with direct contributions to banking management. These may include new optimization formulations and solution algorithms, procedures for improving computational performance, as well as hybrid methodologies. Case studies and application papers are also welcome. Such papers should highlight the unique contributions of OR in the practice of banking management, test the actual performance of OR methods, indicate the existing limitations, and provide significant new insight into the problems under consideration.

Instructions for authors can be found at:

<http://www.springer.com/business/operations+research/journal/10479>

Authors should submit a cover letter and a manuscript by September 30th, 2011, via the journal's online submission site. Manuscripts submitted after the deadline may not be considered for the special volume and may be transferred to a regular volume.

Please see the Author Instructions on the site if you have not yet submitted a paper through this web-based system. Be sure to note in the Manuscript Comment text that your work is intended for the special volume and to select the article type "***SI: OR in Banking Management***".

Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.

Guest Editors:

Constantin Zopounidis, Technical University of Crete, Greece (kostas@dpem.tuc.gr)
