
Call for Papers
Annals of Operations Research
Special Volume: Optimization Models with Economic and Game Theoretic Applications

The ***Annals of Operations Research*** seeks submissions for a special volume on *Optimization Models with Economic and Game Theoretic Applications*.

For this special volume, we expect original research papers of high quality providing theoretical and/or practical applications of optimization models.

The main topics of interest are:

- Linear and nonlinear optimization
- Multi-objective optimization
- Combinatorial optimization
- Optimization models in statistics
- Optimization models in graphs
- Complementarity models and variational inequalities
- Reliability optimization models
- Optimization models in game theory
- Optimization models in finance and economics.

The deadline for submission is **June 30, 2013**.

Instructions for authors can be found at:

<http://www.springer.com/business/operations+research/journal/10479>

Authors should submit a cover letter and a manuscript by June 30, 2013 via the Journal's online submission site. Manuscripts submitted after the deadline may not be considered for the special volume and may be transferred to a regular volume.

Please see the Author Instructions on the web site if you have not yet submitted a paper through Springer's web-based system, *Editorial Manager*. Be sure to leave a comment that your work is intended for the special volume and to select the article type "**SI: Optimization Models with Econ. & Game Th. App.**"

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere.

Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.
