Annals of Operations Research

Special Issue: Scalable Optimization and Decision-Making in Operations Research

Widespread new development trends and characteristics in emerging information technology such as internet and big data technology are driving the technology revolution in almost all areas, including intelligentization, greenization, servitization. Interconnections are becoming important for the development and revolution of the manufacturing industry and others. Interdisciplinary and networked innovative platforms are reforming the innovation system of many fields. This special issue seeks to publish papers that examine significant scalable optimization and decision-making problems in operations research application areas.

The special issue invites submissions in all areas, including, but not limited to:

- | | |
|--|--|
| ● Network manufacturing | ● Industrial engineering |
| ● Organizational management | ● Behavioral operations management |
| ● Scalable optimization in healthcare operations | ● Operations management of smart factories |
| ● Big data applications in smart manufacturing | ● Green logistics operations and management |
| ● Inventory planning and control of green products | ● Engineering management of high-end equipment manufacturing |
-

Authors who are interested in the above topics can submit their unpublished work. A clear indication of the motivation and comparison with prior related work should be presented. Simultaneous submission to a journal or other conferences with refereed proceedings is not allowed.

Instructions for authors can be found at:

<http://www.springer.com/business/operations+research/journal/10479>

Authors should submit a cover letter and a manuscript by **31 May 2020** via the journal's online submission site. Be sure to leave a comment that your work is intended for the special issue and to select the article type "**S.I.: Scalable Optimization and Decision-Making in OR.**" Manuscripts submitted after the deadline may not be considered for the special issue and may be transferred to a regular issue.
